

Business Continuity Planning Guide

April 2013

Introduction

Departments can do much to prepare for the impact of the many hazards faced in today's world including natural hazards like floods, tornadoes, earthquakes and widespread serious illness such as a flu virus pandemic. Human-caused hazards include accidents, acts of violence by people and acts of terrorism. Examples of technology-related hazards are the failure of malfunction of systems, equipment or software.

To be better prepared to respond to these hazards, all UNL departments and units are asked to use this form to describe how your department or unit will operate during an emergency, and recover afterwards to be fully operational.

This is your Plan; feel free to augment this template to meet your needs. The process of planning for an emergency is very valuable. Be collaborative when drafting this, and seek comments from your staff and leadership. For detailed instructions and more information, call University Police at 402-472-7632.

Planning Assumptions

- Emergencies or threatened emergencies can adversely impact the University's ability to continue essential functions and provide support to the day-to-day operations
- There will be a sufficient number of surviving and available senior managers with adequate supporting personnel to continue the essential functions of the University
- When an emergency incident occurs that impacts essential University functions, the University will implement the Emergency Management/Business Continuity Plan and activate an Emergency Operations Center
- Communications capabilities, transportation, and other infrastructures will be sufficiently intact to allow implementation of this plan
- University personnel and outside resources will be available as necessary to continue essential functions
- Recovery of a critical subset of the University's functions and application systems will occur and allow essential operations to continue
- A disaster may require student, faculty, staff, and the public to function with limited support services and some degradation of service, until a full recovery is made
- Departmental Business Continuity Plans will assist in the development of objectives for response and recovery from an emergency

A: Your Department's Leadership Succession

List the people who can make operational decisions if the head of your department or unit is absent.

	Name	Phone Number	Alt Phone Number
Dean/Director			
First Successor			
Second Successor			
Third Successor			

B: Your Department's Essential Functions

List below your department's functions that are essential to operational continuity and/or recovery, and who is responsible for them. Make sure that alternates are sufficiently cross-trained to assume responsibilities.

Essential Function:	Example: Provide classroom technology support		
	Primary	Alternate	Second Alternate
People Responsible	Joe Smith	Mary Taylor	Steven Jones

E: Mitigation Strategies

Considering your objectives, dependencies and essential functions, describe the steps you can take now to minimize the incident's impact on your operations. For example, you may wish to stock up on your critical supplies or develop contingency work-at-home procedures. This may be the most important step of your emergency planning process. Formulation of your mitigation strategies may require reevaluation of your objectives and functions. (Include this information as "Attachment E" on a separate document).

F: Recovery after the Incident

Describe your Plan to fully resume operations as soon as possible after the wave has passed. Identify and address resumption/scheduling of normal activities and services, work backlog, resupply of inventories, continued absenteeism, the use of earned time off, and emotional needs. (Include this information as "Attachment F" on a separate document).

G: Special Considerations for Your Department

Describe here any additional or unique considerations that your department may face in an incident. (Include this information as "Attachment G" on a separate document).

H: Key Internal (Within UNL) Dependencies

List below the products and services upon which your department depends and the internal (UNL) departments that provide them. (Include this information as "Attachment H" on a separate document).
